Job Summary:

The positions could be Assistant Professor/Associate Professor/Professor depending on the experience of the candidate.

Responsible for teaching, research, and service in their designated field of expertise within the academic department. The role requires a strong commitment to student success, scholarly activity, and service to the department and university.

Key Responsibilities:

- Develop and teach undergraduate and graduate courses in their area of expertise.
- Create and maintain a supportive and inclusive learning environment that facilitates student learning.
- Evaluate and grade student work, provide feedback, and maintain accurate and timely records of student progress.
- Participate in course and curriculum development, including updating and revising course materials and assessments.

Research:

- Conduct original research in their field of expertise and publish scholarly articles, books, and/or other creative works.
- Seek external funding to support research projects.
- Collaborate with colleagues within and outside the department to promote research activities.
- Mentor and advise graduate students on research projects.

Service:

- Participate in service activities within the department, college, and university.

- Participate in departmental and university committees.
- Engage in professional development activities and stay current in their field of expertise.
- Build and maintain relationships with community partners to promote the university and department.

Qualifications:

- PhD degree in the relevant field
- Demonstrated ability to teach effectively at the undergraduate and graduate levels.
- A record of scholarly research and publication in the relevant field.
- Strong written and verbal communication skills.
- Ability to work collaboratively with colleagues within and outside the department.
