

Job description-

The NCBS, which is a constituent of the Tata Institute of Fundamental Research, is situated in Bengaluru, India. Its faculty members are engaged in biological research of high quality across the scales, from the molecular to ecosystem. The NCBS boasts numerous cutting-edge scientific facilities and fosters a culture of scientific excellence. The institute is presently seeking to recruit new faculty members in all fields, with a particular emphasis on theoretical, mathematical and computational biology, cell physiology, neurosciences, Biodiversity and Conservation, Infectious Diseases/ Epidemiology/Human Immunology, and Chemical Ecology. The NCBS places a strong emphasis on promoting diversity and inclusivity in the hiring process.
